- CGPA: 8.5/10

## Certifications

**Besant Technologies**                                                                                          may 2025

Java Fullstack Development Training

## Projects

**Personal Portfolio Website**                                                                    github.com/repo
- A personal portfolio website designed and developed to showcase my skills, projects, and professional experience. The website features a clean, modern, and responsive design that works seamlessly across devices.
- Tools Used: HTML, CSS and Javascript

**Movie Search App**                                                                                 github.com/repo
- A fast, responsive, and interactive web application built using React.js and Vite for movie enthusiasts to search and explore movies easily. The app fetches real-time movie data from The Movie Database (TMDb) API, allowing users to quickly find detailed information about movies.
- Tools Used: React js, Vite, TMDb API

**Employee Management System**                                                          github.com/repo
- A comprehensive full-stack web application for managing employee records efficiently. The system allows administrators to Create, Read, Update, and Delete (CRUD) employee information with a user-friendly interface and secure backend.
- Tools Used: React js, Bootstrap, Spring Boot and MySQL

## Technical Skills

**Frontend:** Programming Languages:HTML5, CSS3, JavaScript(ES6 +)
Libraries: Bootstrap5, React js Code Editor: Visual Studio Code

**Backend:** Programming Language: Java
Framework: Spring Boot, IDE: Eclipse and Intellij IDEA

**Database:** Language: SQL (MySQL)
Tool: MySQL Workbench
